Remarkable effects

- 🎨 Creative
- 🤩 Euphoric

More about White Widow CBD Auto

If you are looking for speed and efficiency, genetics **White Widow CBD Auto** of **Dutch Passion** It is an elite autoflowering. Designed to complete its cycle at lightning speed without depending on photoperiods, this automatic wonder will give you fruity and fruity flavors in record time, with a euphoric effect that rivals the best photodependent strains.

Flower appearance. Its buds have nothing to envy of traditional genetics. They form thick floral cones covered in trichomes that smell like heaven. The calyx-leaf ratio is excellent for an auto, which makes manicure greatly easier.

Plant Morphology. It has a compact and robust structure, perfect for growing in small spaces, discreet balconies or terraces. Being autoflowering, it will begin to produce pistils naturally from the third or fourth week of life.

Frequently Asked Questions

What is the ideal climate to grow White Widow CBD Auto ?

Cars love everything! They can be grown outdoors almost all year round as long as temperatures do not drop below 15ºC. Indoors, give them a continuous cycle of 20 hours of light and 4 hours of darkness to get the most out of them.

What training techniques work best with White Widow CBD Auto ?

With autoflowering strains, less is more. Avoid aggressive pruning (such as apical pruning) since their short vegetative cycle does not give them time to recover. Stick to very gentle LST (Low Stress Training) if you need to open the branches.

What type of fertilization does White Widow CBD Auto need?

Eat lightly but constantly. Avoid overfertilizing during the first three weeks and be sure to add a root stimulator from the first day so that the plant gains a good size before starting to flower.

How should irrigation and humidity be for White Widow CBD Auto ?

The golden trick with autos: very short and frequent watering at the beginning so as not to waterlog the small root, and move on to very aerated substrates (add 30% perlite or coconut) to maximize its explosive development.

Is it necessary to prune the White Widow CBD Auto plant?

NO. Avoid pruning branches in autoflowering genetics. At most, remove a leaf that is covering an important bud in the final phase of maturation, but avoid stressing the plant.
