- Sleeping aid

Flavours and smell

- Citric
- Fuel
- Spices
- Pine

Effects effects

- Sleepy
- Creative
- Relaxed

More about CBD Charlotte’s Angel

CBD Charlotte’s Angel nace del cruce de Dutch Charlotte con Red Angel, usando esquejes de Red Angel ricos en CBD. Su THC se queda por debajo del 1% y el CBD ronda el 15% de media. Es una opción muy buscada si quieres comprar semillas feminizadas de CBD con producción de 400-450 g/m².

It doesn’t give you a strong high. It creates a sense of calm and stress relief, without any pronounced psychoactive effects. Some users describe a feeling of relaxation, along with a touch of creativity and focus.

Appearance of the flower. A pungent, penetrating aroma, with notes of diesel, citrus and pine. Some phenotypes lean more towards earthy notes, with hints of blueberry and spices.

Plant morphology. A tall, spiky plant with sativa dominance. It can stretch by between 150% and 300% during flowering, particularly in the first 4–5 weeks. Harvesting usually takes place at 11–12 weeks.

Frequently Asked Questions

What is the ideal climate for growing CBD Charlotte's Angel?
This variety is designed for indoor growing. Its long flowering period is ill-suited to temperate climates, and the photoperiodic variety is recommended for tropical and subtropical regions.

Which training techniques work best with CBD Charlotte's Angel?
With such a strong stretch, start training early. LST and a SCROG mesh help keep the height under control.

What sort of fertiliser does CBD Charlotte's Angel need?
Balanced feeding, with more phosphorus and potassium during flowering, is enough. Avoid excess nitrogen so as not to lengthen the cycle even further.

What should watering and humidity be like for CBD Charlotte's Angel?
Water moderately and ensure good drainage. Keep humidity low at the end of flowering to protect the buds.

Does the CBD Charlotte's Angel plant need pruning?
Remove the lower leaves and the branches that get no light. Gentle pruning improves ventilation without forcing a plant that still has a lot of growing to do.
