Süß · Erdig · Vanille

Effects effects

Fröhlich · Kreativ · Entspannt

More about Royal CBG Auto

Royal CBG Auto focuses on CBG, an uncommon cannabinoid. Among the autoflowering cannabis seeds from Royal Queen Seeds, it completes its cycle in 65-70 days from germination and yields 350-450 g/m² indoors. It is a short-cycle variety with compact growth, made for small spaces.

The effect is clear, calm and relaxing, with a sense of well-being and creativity. The aroma recalls vanilla and earth. You can enjoy it without feeling stoned, at any time. Its 6-8% CBG makes it a rarity among the brand's autoflowering strains, for anyone who wants to explore a different cannabinoid profile.

Appearance of the Flower. Fragrant flowers with a sweet, vanilla-like aroma and an earthy undertone. The THC content is just 0.09 per cent. The combination of vanilla and earth makes it very recognisable when you open the jar.

Plant Morphology. Compact and fast: 80-90 cm indoors and 80-100 cm outdoors. It's ideal for small tents or adapted cabinets. It fits in small cabinets or tents and can also be grown outdoors with gentle training techniques, which keep it low.

Frequently Asked Questions

What are the ideal growing conditions for Royal CBG Auto?
It tolerates varied climates and performs well in cooler environments. Choose a bright, stable spot.

Which training techniques work best with Royal CBG Auto?
Outdoors, use LST to keep the plant low. Avoid strong stress, which affects autoflowering plants.

What sort of fertiliser does Royal CBG Auto need?
Provide nutrients in moderation. Start with low doses and increase only if needed.

What are the ideal watering and humidity conditions for Royal CBG Auto?
Water in moderation and let the substrate breathe between waterings. Take care with ventilation in your grow.

Does the Royal CBG Auto plant need pruning?
It doesn't need pruning. Simply remove leaves that block the light from the buds. For even development, remove only what is essential and avoid big cuts.
